PRINCIPLES OF ENVIRONMENTAL COMPLIANCE AND ENFORCEMENT

This intensive three-day course provides a framework for designing effective compliance strategies and enforcement programs. The course defines the terms compliance and enforcement, introduces basic principles, and explores different approaches for implementing each element of the framework. The course is delivered through a series of exercises by the instructors who guide participants through the concepts and principles of environmental compliance and enforcement. Participants, through a "case study" will take part in a negotiation session to resolve a violation of environmental requirements that mimics a real-life enforcement situation.

DATE / TIME	TOPICS
Monday, November 1, 2004	Introduction to Course Environmental Problems, Environmental Requirements Compliance Motivation & Monitoring Enforcement Response & Priorities Components of an Enforcement Program & Introduction to A Principles Case Study
